Attached to this certificate.

Attached to the certificate for the following claim:

Claim Sketch

1 IN. = 1 MI.

Attach an extra sheet for Additional Owners and Signatures

This Amendment corrects the document originally recorded as: .
Document No. _____ OR Book _____ Page _____

Div of Mining, Land & Water Use:
ADL

GENERAL INSTRUCTIONS ("DO NOT RECORD THIS SIDE")

Important: Amending a mining claim may only be done if there are no conflicts with other claims (AS 38.05.200). If DNR's records indicate a conflict, the amendment will be rejected. This form is to be used as an amendment to the original CERTIFICATE OF LOCATION to be filed with the District Recorder's Office for the area in which the MTRSC claim is located. This form should *only* be used for mining claims or mining leasehold locations that are located under Title 38 of the Alaska Statutes on land under the jurisdiction of the State of Alaska. This form may also be used as a LOCATION NOTICE to be posted on the northeast corner monument (corner #1). Please note that locations on land selected by, but not yet conveyed to, the State are made at the locator's own risk. AS 38.05.275,11 AAC 86.115(a). *For information about mineral locations under federal mining law, please contact the Bureau of Land Management.*

POSTING THE AMENDED LOCATION NOTICE: Where this form is used as an amendment to the original LOCATION NOTICE on the northeast corner monument, it *must* contain a sketch map of the claim which depicts to the best of your knowledge the location of the claim in relation to the surrounding mineral locations. The AMENDED LOCATION NOTICE must be posted on monument #1 located at the northeast corner of the claim.

Please note that AS 38.05.195(b)(1) states, "A locator may locate a claim based on the ground location of a complete quarter section or quarter-quarter section of a township on a rectangular survey system approved by the commissioner; a claim established in this manner may be known as a meridian, township, range, section, and claim system location, or MTRSC location; a locator using the MTRSC system to locate a claim shall in good faith mark the corners of a location as closely as practical to the existing quarter section or quarter-quarter section of the rectangular survey system approved by the commissioner; the corners marked on the ground of a claim established in accordance with this paragraph and regulations of the commissioner control in the event of a conflict over boundaries for the quarter section of quarter-quarter section of the protracted or actual survey approved by the commissioner".

RECORDING THE AMENDED CERTIFICATE OF LOCATION: *When this form is used as an amended LOCATION CERTIFICATE, it MUST contain ALL the information requested on the front of this form including the original document number, unless otherwise noted. Your sketch of the MTRSC claim on the front of this certificate must show the section numbers, and the location of the claim in relation to the protracted or surveyed section lines already drawn on the "claim sketch". In lieu of this claim sketch, you may instead include a drawing of the claim's location at a scale of no less than 1:63,360 (1" = 1 mile). It is suggested that the claim be drawn on (a photocopy of) a United States Geological Survey (U.S.G.S.) 1:63,360-scale map attached or photocopied onto this form. U.S.G.S. maps may be purchased from U.S.G.S. field offices in Anchorage and Fairbanks or from private sources. Whether you use a U.S.G.S. map or draw your own claim sketch, it must show, to the best of your knowledge, the claim's relationship to existing surrounding mining claims, leasehold locations, or prospecting sites.*

Please note that you may attach and record a separate map for a claim or a claim group with your certificate(s) that provides the information required above. The map must be no larger than 8 1/2" X 11" and must include a scale and a direction (North) arrow. If you select this option, you must complete the statement at the bottom of the front of this form.

To record the AMENDED CERTIFICATE OF LOCATION with the State of Alaska, submit the original AMENDED CERTIFICATE OF LOCATION to the District Recorder's Office for the area in which the claim is located. If mailing to the recorder's office, check with the office beforehand so you can submit the correct fee. The recording fees change from time to time. **You may check on recording fees and recording offices through the internet at the following site address: www.alaska.gov/ssd/recoff/.** The recorder's office will forward copies of all recorded mining documents to the Alaska Department of Natural Resources, Division of Mining, Land & Water.

Failure to properly complete either the amended location notice/ certificate may constitute abandonment of the mining claim. AS 38.05.265. Failure to timely record the amended location/ certificate with the proper district recorder's office constitutes abandonment of the mining claim. AS 38.05.265.
